Because they are immensely useful and help you gain success in a Sales-Cloud-Consultant certification exam, Many customers may be doubtful about our price of our Sales-Cloud-Consultant exam questions.

NEW QUESTION: 1

You are employed as a network administrator at ABC.com.

ABC.com has an active directory domain named ABC.com.

All servers including domain controllers on the ABC.com network have Windows Server 2012 R2 installed.

ABC.com has its headquarters in London and an office in paris.

The London Office has a domain controller named server1, which is configured as a writeable domain controller that servers as a Global catalog server and a DNS server.

Server1 is configured to host an Active Directory-integrated zone for ABC.com.

The Paris office has a Read-Only domain controller (RODC) named server2 which servers as a Global catalog server.

After installing the DNS server role on server2, you want to make sure that the ABC.com zone is replicated to server2 via active directory replication.

Which of the following actions should you take?

A. You should consider making use of Active Directory Sites and Services to Configured replication

B. You should consider making use of repadmin.exe to configure replication

C. You should consider making use of replmon.exe to configure replication.

D. You should consider making use of Active Directory Schema To configure replication

Answer: A

NEW QUESTION: 2

You can VMotion between compatible hosts from two different datacenters, if managed by the same VirtualCenter?

A. False

B. True

Answer: A

Explanation:

Because of the namespace property, VMotion is permitted between any two compatible hosts within a datacenter, but even powered off virtual machines cannot be moved between hosts in different datacenters. Moving an entire host between two datacenters is permitted. page 24 Basic Administration Guide

NEW QUESTION: 3

Answer:

Explanation:

Explanation

* Getting started with Windows Azure Online Backup is a simple two-step process:

1. Get a free preview Windows Azure Online Backup account (with 300 GB of cloud storage).
2. Login to the Windows Azure Online Backup portal and download and install the Windows Azure Online Backup agent for Windows Server 2012 R2 or System Center 2012 SP1 Data Protection Manager. For Windows Server 2012 R2 Essentials, download and install the Windows Azure Online Backup integration module.

Once you have installed the agent or integration module you can use the existing user interfaces for registering the server to the service and setting up online backup.

* Install the Windows Azure Online Backup agent

Before you can begin to use the online protection service, you must download and install the Windows Azure Online Backup agent on the Data Protection Manager (DPM) server. You can download the Windows Azure Online Backup agent from the Windows Azure Online Backup portal.

To registering for online protection (box 4)

After you install the agent on the DPM server, you must register the DPM server for online protection. Click Register Online Protection on the tool ribbon to start the Windows Azure Backup Registration wizard.

Etc. (finish the steps in the wizard).
