Fix Those Stray Pixels Fast, It doesn't indicate fault in the certificate [Training C\\_HANAIMP\\_17 Pdf](#) itself, but rather is more a reflection of its status, It is the perfect way to proceed so you can handle things in an efficient way.

We make it a reality, If you are interested in Juniper JN0-1102 or any other exam, the newly designed software will be your ultimate help in flawless preparation.

JN0-1102 exam dumps vce and JN0-1102 dumps pdf are created by our IT workers who are specialized in the study of real JN0-1102 test dumps for many years and they check the updating of JN0-1102 vce dumps everyday to make sure the valid of JN0-1102 dumps latest, so you can rest assure of the accuracy of our JN0-1102 vce dumps.

We also will check the updates at any time every day, Before you go ahead and earn your JN0-1102 certification, make sure you meet the following requirements by choosing one of the options available: Preparation.

Want to read and study full version of JN0-1102 real exam questions, As for candidates who will attend the exam, choosing the practicing materials may be a difficult choice.

### **Juniper - Fantastic JN0-1102 Best Preparation Materials**

Once you buy our JN0-1102 test prep materials, during the whole year, as soon as we have

compiled a new version of the exam study materials, our company will send the latest one to you for free.

You can contact us whenever you need help, JN0-1102 exam dumps of us will give you the practice you need, Our valid JN0-1102 test questions can be instantly downloaded and easy to understand with our 100% correct exam answers.

You will never be disappointed for buying our JN0-1102 exam questions, So they want to get JN0-1102 certification rise above the common herd, It is undeniable that JN0-1102 pdf trainings have a bearing on the results of exam outcomes.

You can study the Design, Associate (JNCDA) guide torrent at any time and any place, [Valid PDI Test Cost](#) If you are used to studying on paper or you want to use our products for simple presentation, PDF version will be your choice.

We have professional technicians to check the website at times, therefore we can provide you with a clean and safe shopping environment if you buy JN0-1102 training materials.

Your test pass rate is going to reach more than 99% if you are willing to use our JN0-1102 study materials with a high quality, Their contents are sorted out by professional experts who dedicated in this area for many years.

#### **NEW QUESTION: 1**

Bei der Implementierung der Sicherheitsarchitektur MUSS ein Informationssicherheitsmanager sicherstellen, dass die Sicherheitskontrollen:

- A. Bilden Sie mehrere Barrieren gegen Bedrohungen.
- B. sind die billigsten.
- C. sind transparent.
- D. werden über Sicherheitsrichtlinien kommuniziert.

**Answer: A**

#### **NEW QUESTION: 2**

Your company has 1,000 client computers. Each client computer has 1 GB of RAM.

You are planning to deploy Windows 7 Enterprise.

You need to design a zero-touch deployment strategy to increase the number of client computers that can be imaged at one time.

What should you do?

- A. Increase the amount of RAM on the client computers.
- B. Change from multicast to unicast deployment of images.
- C. Change from unicast to multicast deployment of images.
- D. Decrease the trivial file transfer protocol (TFTP) block size on the TFTP server.

**Answer: C**

Explanation:

Performing Multicast Deployments

In order to deploy an image using multicasting instead of unicasting, you must first create a multicast transmission. Multicast transmissions make the image available for multicasting, which enables you to deploy an image to a large number of client computers without overburdening the network. When you deploy an image using multicasting, the image is sent over the network only once, which can drastically reduce the amount of network bandwidth that is used.

### NEW QUESTION: 3

You need to upload video to the company's Azure environment.

What should you do?

- A. Write directly to the storage REST APIs.
- B. Use the Azure Import/Export service to move the data.
- C. Create a site-to-site VPN connection.
- D. Create an ExpressRoute connection.

**Answer: D**

Explanation:

/ Media files must be stored in Azure BLOB storage.

/ Media uploads must have fast data transfer rates (low latency) without the need to upload the data offline.

Topic 5, Northwind Electric Cars Background

Overview

Northwind Electric Cars is the premier provider of private, low-cost transportation in Denver. Northwind drivers are company employees who work together as a team. The founding partners believe that by hiring their drivers as employees, their drivers focus on providing a great customer experience. Northwind Electric Cars has a reputation for offering fast, reliable, and friendly service, due largely to their extensive network of drivers and their proprietary dispatching software named NorthRide.

Northwind Electric Cars drivers depend on frequent, automatic updates for the NorthRide mobile app. The Northwind management team is concerned about unplanned system downtime and slow connection speeds caused by high usage. Additionally, Northwind's in-house data storage solution is unsustainable because of the new influx of customer data that is retained. Data backups are made periodically on DVDs and stored on-premises at corporate headquarters.

Apps

NorthRide App

Northwind drivers use the NorthRide app to meet customer pickup requests. The app uses a GPS transponder in each Northwind vehicle and Bing Maps APIs to monitor the location of each vehicle in the fleet in real time. NorthRide allows Northwind dispatchers to optimize their driver coverage throughout the city.

When new customers call, the dispatcher enters their pickup locations into NorthRide.

NorthRide identifies the closest available driver. The dispatcher then contacts the driver with the pick-up details. This process usually results in a pick-up time that is far faster than the industry average.

Drivers use NorthRide to track the number of miles they drive and the number of customers they transport. Drivers also track their progress towards their established goals, which are measured by using key performance indicators (KPIs).

NorthRide App 2.0

Northwind Electric Cars is growing quickly. New callers often wait for their calls to be answered because the dispatchers are contacting their drivers to arrange pickups for other customers.

To support the growth of the business, Northwind's development team completes an overhaul of the NorthRide system that it has named NorthRide 2.0. When a dispatcher enters a customer's pickup location, the address and driving directions are automatically sent to the driver who is closest to the customer's pickup location.

Drivers indicate their availability on the NorthRide mobile app and can view progress towards their KPI's in real time. Drivers can also record customer ratings and feedback for each pickup.

Business Requirements

Apps

NorthRideFinder App

Northwind Electric Cars needs a customer-facing website and mobile app that allows customers to schedule pickups. Customers should also be able to create profiles that will help

ensure the customer gets a ride faster by storing customer information.

### Predictor App

Northwind Electric Cars needs a new solution named Predictor. Predictor is an employee-facing mobile app. The app predicts periods of high usage and popular pickup locations and provides various ways to view this predictive data. Northwind uses this information to better distribute its drivers. Northwind wants to use the latest Azure technology to create this solution.

### Other Requirements

- \* On-premises data must be constantly backed up.
- \* Mobile data must be protected from loss, even if connectivity with the backend is lost.
- \* Dispatch offices need to have seamless access to both their primary data center and the applications and services that are hosted in the Azure cloud.
- \* Connectivity needs to be redundant to on-premises and cloud services, while providing a way for each dispatch office to continue to operate even if one or all of the connection options fail.
- \* The management team requires that operational data is accessible 24/7 from any office location.

### Technical Requirements

#### Apps and Website

#### NorthRide / NorthRideFinder Apps:

- \* The solution must support on-premises and Azure data storage.
- \* The solution must scale as necessary based on the current number of concurrent users.
- \* Customer pickup requests from NorthRideFinder must be asynchronous.
- \* The customer pickup request system will be high in volume, and each request will have a short life span.
- \* Data for NorthRideFinder must be protected during a loss of connectivity.
- \* NorthRide users must authenticate to the company's Azure Active Directory.

#### Northwind Public Website

- \* The customer website must use a WebJob to process profile images into thumbnails
- \* The customer website must be developed with lowest cost and difficulty in mind.
- \* The customer website must automatically scale to minimize response times for customers.

### Other Requirements

#### Data Storage:

- \* The data storage must interface with an on-premises Microsoft SQL backend database.
- \* A disaster recovery system needs to be in place for large amounts of data that will backup to Azure.
- \* Backups must be fully automated and managed the Azure Management Portal.
- \* The recovery system for company data must use a hybrid solution to back up both the on-premises Microsoft SQL backend and any Azure storage.

#### Predictive Routing:

- \* An Azure solution must be used for prediction systems.
- \* Predictive analytics must be published as a web service and accessible by using the REST API.

#### Security:

- \* The NorthRide app must use an additional level of authentication other than the employee's password.
- \* Access must be secured in NorthRide without opening a firewall port.
- \* Company policy prohibits inbound connections from internet callers to the on-premises network.
- \* Customer usernames in NorthRideFinder cannot exceed 10 characters.
- \* Customer data in NorthRideFinder can be received only by the user ID that is associated with the data.
