NEW QUESTION: 3

생산자, 도매 업체 및 소매 업체가 통합 시스템으로 작동하는 채널 구조는 다음과 같습니다.

- A. 멀티 채널 시스템.
- B. 수직 분배 시스템.
- C. 일방 분포 시스템.
- D. 수평 분배 시스템.

Answer: B

Explanation:

In vertical distribution systems, producers, wholesalers, and retailers act as a unified system. Channel conflict is managed through common ownership, contractual relationships, or administration by one or a few dominant channel members. Horizontal distribution systems consist of two or more companies at one level of the channel working together to exploit new opportunities, such as the introduction of ATMs in supermarkets. The joint nature of horizontal distribution efforts is the tool for managing channel conflict. In a multichannel system, a single firm sets up two or more channels to reach one or more customer segments. Because such a system is managed by a single firm, channel conflicts can be evaluated and managed internally.
