Answer:
Explanation:

Explanation

* You need to ensure that at least six worker role instances and eight web role instances are available when you apply upgrades to the service.
* You can decide whether you want to update all of the roles in your service or a single role in the service. In either case, all instances of each role that is being upgraded and belong to the first upgrade domain are stopped, upgraded, and brought back online. Once they are back online, the instances in the second upgrade domain are stopped, upgraded, and brought back online.
