NEW QUESTION: 1

A network architect recently deployed AToM solutions for large enterprises over a service provider core network. The architect now asks to deploy QoS over the same VPN to reinforce the SLA for these customers.

Which MPLS label field can be used for this purpose?

- A. experimental bits
- B. discard/eligibility field
- C. last 8 bits
- D. type of service

Answer: A

NEW QUESTION: 2

The main mail server of a financial institution has been compromised at the superuser level; the only way to ensure the system is secure would be to:

- A. change the root password of the system.
- B. rebuild the system from the original installation medium.
- C. implement multifactor authentication.
- D. disconnect the mail server from the network.

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Rebuilding the system from the original installation medium is the only way to ensure all security vulnerabilities and potential stealth malicious programs have been destroyed. Changing the root password of the system does not ensure the integrity of the mail server. Implementing multifactor authentication is an aftermeasure and does not clear existing security threats. Disconnecting the mail server from the network is an initial step, but does not guarantee security.

NEW QUESTION: 3

Which below statement is CORRECT?

- A. Maximo for Safety, Health, and Environment only addresses the health and safety of Employees and Consumers
- B. Maximo for Safety, Health, and Environment addresses the health and safety of Employees, Consumers, Communities, and Environment.
- C. Maximo for Safety, Health, and Environment only addresses the health and safety of Employees only
- D. Maximo for Safety, Health, and Environment only addresses the health and safety of Employees, Consumers, and Communities

Answer: B

Explanation:
