We play an active role in making every customer in which we selling our C_TS452_2020 practice dumps a better place to live and work.

NEW QUESTION: 1

You discover that VM3 does NOT meet the technical requirements.

You need to verify whether the issue relates to the NSGs.

What should you use?

- A. the security recommendations in Azure Advisor
- B. Diagnostic settings in Azure Monitor
- C. Diagnose and solve problems in Traffic Manager Profiles
- D. IP flow verify in Azure Network Watcher
- E. Diagram in VNet1

Answer: D

Explanation:

Scenario: Litware must meet technical requirements including:

Ensure that VM3 can establish outbound connections over TCP port 8080 to the applications servers in the Montreal office.

IP flow verify checks if a packet is allowed or denied to or from a virtual machine. The information consists of direction, protocol, local IP, remote IP, local port, and remote port. If the packet is denied by a security group, the name of the rule that denied the packet is returned. While any source or destination IP can be chosen, IP flow verify helps administrators quickly diagnose connectivity issues from or to the internet and from or to the on-premises environment.

Topic 1, Litware, inc.

Overview

Litware, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The Montreal office has 2,000 employees. The Seattle office has 1,000 employees. The New York

office has 200 employees.

All the resources used by Litware are hosted on-premises.

Litware creates a new Azure subscription. The Azure Active Directory (Azure AD) tenant uses a domain named Litware.onmicrosoft.com. The tenant uses the P1 pricing tier.

Existing Environment

The network contains an Active Directory forest named Litware.com. All domain controllers are configured as DNS servers and host the Litware.com DNS zone.

Litware has finance, human resources, sales, research, and information technology departments. Each department has an organizational unit (OU) that contains all the accounts of that respective department. All the user accounts have the department attribute set to their respective department. New users are added frequently.

Litware.com contains a user named User1.

All the offices connect by using private links.

Litware has data centers in the Montreal and Seattle offices. Each data center has a firewall that can be configured as a VPN device.

All infrastructure servers are virtualized. The virtualization environment contains the servers in the following table.

Litware uses two web applications named App1 and App2. Each instance on each web application requires 1GB of memory.

The Azure subscription contains the resources in the following table.

The network security team implements several network security groups (NSGs).

Planned Changes

Litware plans to implement the following changes:

- * Deploy Azure ExpressRoute to the Montreal office.
- * Migrate the virtual machines hosted on Server1 and Server2 to Azure.
- * Synchronize on-premises Active Directory to Azure Active Directory (Azure AD).
- * Migrate App1 and App2 to two Azure web apps named webApp1 and WebApp2.

Technical Requirements

Litware must meet the following technical requirements:

- * Ensure that WebApp1 can adjust the number of instances automatically based on the load and can scale up to five instance*.
- * Ensure that VM3 can establish outbound connections over TCP port 8080 to the applications servers in the Montreal office.
- * Ensure that routing information is exchanged automatically between Azure and the routers in the Montreal office.
- * Enable Azure Multi-Factor Authentication (MFA) for the users in the finance department only.
- * Ensure that webapp2.azurewebsites.net can be accessed by using the name app2.Litware.com.
- * Connect the New Your office to VNet1 over the Internet by using an encrypted connection.
- * Create a workflow to send an email message when the settings of VM4 are modified.
- * Create a custom Azure role named Role1 that is based on the Reader role.
- * Minimize costs whenever possible.

NEW QUESTION: 2

Drag the security term on the left to the matching description on the right.

Answer:

Explanation:

NEW QUESTION: 3

Which of the following should be part of a disaster recovery plan?

- A. None of the above.
- B. Provide briefing for employees returning to work.
- C. Provide plan for emergency headquarters.
- D. Make one person responsible for health and sanitary conditions.
- E. All of the above.

Answer: E
