Your company uses Azure DevOps to manage the build and release processes for applications. You use a Git repository for applications source control.

You need to implement a pull request strategy that reduces the history volume in the master branch.

Solution: You implement a pull request strategy that uses fast-forward merges.

Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

Explanation

No fast-forward merge - This option merges the commit history of the source branch when the pull request closes and creates a merge commit in the target branch.
