PDF Questions & Answers, Whether you are purchasing our CGEIT training questions, installing or using them, we won't give away your information to other platforms, and the whole transaction process will be open and transparent.

There are various aspects of proving this claim, We will burst another heavy punch to you, Questions & Answers Format, We will be your best friend on your way to get the CGEIT certification with our excellent learning braindumps.

NEW QUESTION: 1

Your client wants a report to see all the incidents with status grouped under the name of the contact. For an unresolved status, the queue information under which the incident is present should be displayed.

What should you use to display the details at different levels?

- A. Applied Filter
- B. Auto Filter
- C. Slicing
- D. Bucket Filter
- E. Rollups

Answer: E

Explanation:

Explanation

You can define rollup levels in a report to group data beneath headings in the report. You can add additional rollup levels to further break down the data under each heading by grouping data under sub-headings.

Using rollups, you can group rows in a report that share the same value in the columns you select for the rollup levels. For example, you could add rollups to an incident report to group incidents by their status, and then add an additional rollup level to group the incidents that have the same status by their assigned staff account.
