Hot MD-101 Reliable Test Forum and High Pass-Rate MD-101 Trustworthy Dumps & Useful Managing Modern Desktops Real Exam

Our MD-101 guide torrent: Managing Modern Desktops expect to help you get the exam

certification with scientific method, According to these ignorant beginners, the MD-101 exam questions set up a series of basic course, by easy to read, withcorresponding examples to explain at the same time, the Managing Modern Desktops study question GCP-GC-REP Trustworthy Dumps let the user to be able to find in real life and corresponds to the actual use of learned knowledge, deepened the understanding of the users and memory.

For any candidate, choosing the MD-101 question torrent material is the key to passing the exam, You will pass the MD-101 exam for sure, Our sales volume is increasing every year.

Last but not least, you are available for our free updated version of the MD-101 real exam, It is very worthy for you to buy our product and please trust us.

Indeed, all kinds of reviewing products are in the market, why you should choose our MD-101 guide torrent questions, At the same time, the MD-101 exam prep is constantly updated.

Our team of unmatched customer support is here 24/7 to Reliable CSST-001 Exam Guide answer any questions you have about the product, And sometimes, they may buy our exam products together.

NEW QUESTION: 1
Ihr Netzwerk enthält eine Active Directory-Domäne mit dem Namen contoso.com. Auf allen Clientcomputern wird Windows ausgeführt
10.
Sie planen, eine Remotedesktop-Verbindungslösung für die Clientcomputer bereitzustellen. Sie haben vier verfügbare Server in der Domäne, die als Remotedesktop-Server konfiguriert werden können. Die Server sind wie in der folgenden Tabelle gezeigt konfiguriert.

Sie müssen sicherstellen, dass alle Remotedesktopverbindungen mithilfe von Remote Credential Guard geschützt werden können.
Lösung: Sie stellen die Remotedesktop-Verbindungslösung mithilfe von Server4 bereit.
Erfüllt dies das Ziel?
A. Ja
B. Nein
Answer: B
Explanation:
No, as Server4 is a Windows Server 2012R2 which does not meet the requirements of Remote Credential Guard.
https://docs.microsoft.com/en-us/windows/access-protection/remote-credential-guard
Remote Credential Guard requirements To use Windows Defender Remote Credential Guard, the Remote Desktop client and remote host must meet the following requirements:
The Remote Desktop client device:
Must be running at least Windows 10, version 1703 to be able to supply credentials.
Must be running at least Windows 10, version 1607 or Windows Server 2016 to use the user's signed-in credentials. This requires the user's account be able to sign in to both the client device and the remote host.
Must be running the Remote Desktop Classic Windows application. The Remote Desktop Universal Windows Platform application doesn't support Windows Defender Remote Credential Guard.
Must use Kerberos authentication to connect to the remote host. If the client cannot connect to a domain controller, then RDP attempts to fall back to NTLM.
Windows Defender Remote Credential Guard does not allow NTLM fallback because this would expose credentials to risk.
The Remote Desktop remote host:

Must be running at least Windows 10, version 1607 or Windows Server 2016.
Must allow Restricted Admin connections.
Must allow the client's domain user to access Remote Desktop connections.
Must allow delegation of non-exportable credentials.

NEW QUESTION: 2
Identifizieren Sie anhand der im Szenario angegebenen Informationen, wie das Team am effektivsten verbessert werden kann. 2 Credits
A. Durch Schulung zur Überprüfung der Anforderungen
B. Durch einen Workshop zu Testdesign-Techniken
