### **NEW QUESTION: 1**

Which authentication protocol is used for the S6b interface?

- A. SSL
- B. EAP-AKA
- C. IPsec
- D. EAP-TLS

**Answer: B**

### **NEW QUESTION: 2**

Ten physical desktops that use a specialized application were migrated to the View environment as linked clones. A newly-created parent virtual machine mimics the original software configuration. The configuration was tested extensively before deployment. Now, whenever a user logs in to a desktop and starts the application, it displays an error that says the SID for this desktop has already been assigned.

Which task should the administrator perform to resolve the problem?

- A. Verify that the customization specification in vCenter Server generates a new SID and continues to use QuickPrep for guest customization.
- B. Change the pool specification so all the users of this application are using the same linked clone desktop.
- C. Recreate the base image and edit the linked clone pool to use this new image.
- D. Create another linked clone pool using the same parent virtual machine and snapshot with Sysprep.

**Answer: D**

### **NEW QUESTION: 3**

A technician is setting up a kiosk. The technician needs to ensure the kiosk is secure and users will have access to only the application needed for customer interaction. The technician must also ensure that whenever the computer is rebooted or powered on it logs on automatically without a password.

Which of the following account types would the technician MOST likely set up on this kiosk machine?

- A. Guest
- B. Power User
- C. Remote Desktop User
- D. Administrator

**Answer: A**

#### **NEW QUESTION: 4**

- A. Option B
- B. Option A
- C. Option D
- D. Option C

**Answer: A**

Explanation:

If the encryption is unsecure then we must look forencryption software updates or patches. If they are available we must install them.

As vulnerabilities are discovered, the vendors of the operating systems or applications often respond by releasing a patch. A patch is designed to correct a known bug or fix a known vulnerability in a piece of software.

A patch differs from an update, which, in addition to fixing a known bug or vulnerability, adds one or more features to the software being updated.
