NEW QUESTION: 1

Refer to the exhibit. An admin has created a new EPG in an ACI fabric. The admin then specified static path binding as show in exhibit after submitting this policy configuration, the admin noticed that this newly created EPG had the fault shown in the exhibit. Which option is the likely explanation of the fault?

- A. There is not enough information to determine the cause of the problem.
- B. There is no fault. The fault is currently in the soaking state and the fault will automatically clear and everything will work as expected.
- C. The admin incorrectly configured this static path a "trunk" when it should have been configured as an access(untagged)port.
- D. The encap VLAN configured is not within the allow range of VLANs as specified by the associated domain.

Answer: D
