NEW QUESTION: 1
You have created two different Account page layouts in Dev1, one for sales reps and and another one for the support team. You have committed the two page layouts on a user story and you are ready to deploy them to the next environment. However, the sales manager makes a last-minute decision for his team to continue using the standard Account page layout for now. What is the easiest way to prevent the sales reps layout from being deployed while deploying the support team layout?
A. Use the Recommit Files Git operation, flag the Re-Create Feature Branch checkbox and select only the layout for the support team.
B. Delete the user story, create a new one and commit just the layout for the support team.
C. Go to the user story and use the Destructive Changes Git operation to delete the sales reps layout. Then, use Commit Changes and just commit the layout for the support team.
D. Use the Recommit Files Git operation, flag the Create New Feature Branch checkbox and select only the layout for the support team.
