And we always put the considerations of the customers as the most **4A0-205 Valid Test Book** important matters, You can choose based on your taste and preference, 80 % of the questions came from simulation questions.

NEW QUESTION: 1

A worker rejoins a legal employees on April 01, 2011 with a work relationship type of contingent worker. The worker was previously associated with the same legal employer from June 21, 2000 till April 01, 2010 with a worker number 1122' and work relationship type of contingent worker. A legal-employer number sequence is used.

Will the worker number be reused for this worker?

- A.** The worker number will not be reused, because the worker has the same work relationship type as the previous one and with the same legal employer
- B.** The worker number will not be reused, because the legal-employer sequence is used.
- C.** The worker number will be reused, because the worker has the same- work relationship type as the previous one and with the same legal employer.
- D.** The worker number will be reused, because the worker is joining the same legal employer after a gap of one year.
- E.** The worker number will be reused, because the worker is joining the same enterprise.

Answer: B

Explanation:

Worker numbers can be generated either manually or automatically.

If you select manual generation, then you are recommended to define a numbering scheme to suit

local requirements. For example, determine whether uniqueness within the enterprise or at the legal employer level is important, and define the numbering scheme accordingly.

If you select automatic worker-number generation, numbers can be allocated from either an enterprise sequence or a legal employer sequence. If you use a legal-employer sequence, worker

numbers are not guaranteed to be unique in the enterprise. Also, they cannot be transferred outside the legal employer: if a worker leaves the enterprise and later starts a new work relationship of the same type but with a different legal employer, a new worker number is allocated to the work relationship.
