A. volume reconstruction progress updates
B. a multipath I/O driver
C. a device discovery option for storage systems to be managed
D. a Manage Host Port Identifiers dialog box
E. a configuration interface for creating disk pools and volume groups
Answer: C

NEW QUESTION: 2
Your are the DBA supporting an Oracle 11g Release 2 database and wish to move a table containing several DATE, CHAR, VARCHAR2, and NUMBER data types, and the table's indexes, to another tablespace.
The table does not have a primary key and is used by an OLTP application.
Which technique will move the table and indexes while maintaining the highest level of availability to the application?
A. Online Table Redefinition.
B. An ALTER TABLE MOVE to move the table and ALTER INDEX REBUILD ONLINE to move the indexes.
C. An ALTER TABLE MOVE to move the table and ALTER INDEX REBUILD to move the indexes.
D. Edition-Based Table Redefinition.
E. Oracle Data Pump.
Answer: A
Explanation:
* Oracle Database provides a mechanism to make table structure modifications without

significantly affecting the availability of the table. The mechanism is called online table redefinition. Redefining tables online provides a substantial increase in availability compared to traditional methods of redefining tables.
*To redefine a table online:
Choose the redefinition method: by key or by rowid
*By key-Select a primary key or pseudo-primary key to use for the redefinition. Pseudo-primary keys are unique keys with all component columns having NOT NULL constraints. For this method, the versions of the tables before and after redefinition should have the same primary key columns.
This is the preferred and default method of redefinition.
*By rowid-Use this method if no key is available. In this method, a hidden column named M_ROW$$ is added to the post-redefined version of the table. It is recommended that this column be dropped or marked as unused after the redefinition is complete. If COMPATIBLE is set to
10.2.0 or higher, the final phase of redefinition automatically sets this column unused. You can then use the ALTER TABLE ... DROP UNUSED COLUMNS statement to drop it.
You cannot use this method on index-organized tables.
Note:
* When you rebuild an index, you use an existing index as the data source. Creating an index in this manner enables you to change storage characteristics or move to a new tablespace. Rebuilding an index based on an existing data source removes intra-block fragmentation. Compared to dropping the index and using the CREATE INDEX statement, re-creating an existing index offers better performance.
Incorrect:
Not E: Edition-based redefinition enables you to upgrade the database component of an application while it is in use, thereby minimizing or eliminating down time.

NEW QUESTION: 3
An increase in income for consumers of a(n) _____ leads to an increase in the quantity purchased at each price.
A. Giffen good.
B. Inferior good.
C. Veblen good.
Answer: C
Explanation:
The opposite is true for a Giffen good and inferior good. Note that Giffen goods are inferior goods.
