As far as our C\_BRIM\_1909 practice test is concerned, the PDF version brings you much convenience with regard to the following two aspects.

### **NEW QUESTION: 1**

Your network contains three servers named HV1, HV2, and Server1 that run Windows Server 2012 R2. HV1 and HV2 have the Hyper-V server role installed. Server1 is a file server that contains 3 TB of free disk space.

HV1 hosts a virtual machine named VM1. The virtual machine configuration file for VM1 is stored in D:VM and the virtual hard disk file is stored in E:VHD.

You plan to replace drive E with a larger volume.

You need to ensure that VM1 remains available from HV1 while drive E is being replaced. You want to achieve this goal by using the minimum amount of administrative effort.

What should you do?

- A. Add HV1 and HV2 as nodes in a failover cluster. Perform a storage migration to HV2.
- B. Perform a storage migration to Server1.
- C. Perform a live migration to HV2.
- D. Add HV1 and HV2 as nodes in a failover cluster. Perform a live migration to HV2.

**Answer: B**

Explanation:

One of the great new features coming in Windows Server 2012 is Storage Migration for Hyper-V. Storage Migration allows an administrator to relocate the source files that make up a virtual machine to another location without any downtime.

Storage Migration creates a copy of the file or files at the new location. Once that is finished, Server

2012 does a final replication of changes and then the virtual machine uses the files in the new location.
