NEW QUESTION: 1

Fill in the blank: The tool _____ generates a R80 Security Gateway configuration report.

- A. fw cpinfo
- B. infoCP
- C. cpinfo
- D. infoview

Answer: C

Explanation:

CPInfo is an auto-updatable utility that collects diagnostics data on a customer's machine at the time of execution and uploads it to Check Point servers (it replaces the standalone cp_uploader utility for uploading files to Check Point servers).

The CPInfo output file allows analyzing customer setups from a remote location. Check Point support engineers can open the CPInfo file in a demo mode, while viewing actual customer Security Policies and Objects. This allows the in-depth analysis of customer's configuration and environment settings.

When contacting Check Point Support, collect the cpinfo files from the Security Management server and Security Gateways involved in your case.

NEW QUESTION: 2

DRAG DROP

A company has 50 client computers that run Windows 8.1. Forty client computers are connected to a secure internal network, and 10 client computers are located in public kiosks. A new company security policy includes the following requirements:

Visitors can access only kiosk computers.

Employees can access and shut down only internal computers.

Only administrators can access all computers remotely.

Only administrators can shut down kiosk computers.

You need to assign security groups to local security policies to meet the requirements.

What should you do? (To answer, drag the appropriate security group or groups to the correct location or locations in the answer area. Security groups may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

Explanation:

NEW QUESTION: 3

Which of the following are required to enable SAP HANA high availability?

There are 2 correct answers to this question.

- A. SAP HANA distributed systems
- B. SUSE Linux Enterprise High Availability Extension
- C. Redundant storage and network
- D. High-performance computing clustering for Linux

Answer: A,C

NEW QUESTION: 4

Under the Uniform Securities Act, which of the following does not need to be included when filing to register a security issue with the state?

- A. copies of the underwriter agreements
- B. All of the above documents must be included when filing to register a security with the state.
- C. a copy of any indenture applying to the security being registered
- D. a copy of the firm's articles of incorporation and bylaws, or the equivalent

Answer: B

Explanation:

Explanation/Reference:

Explanation: The Uniform Securities Act specifies that the initial registration statement should be accompanied by all of the documents listed in the first three selections—a copy of the firm's articles of incorporation and bylaws or their equivalent; copies of any underwriter agreements; and a copy of any indenture that applies to the security being registered. Moreover, these are only some of the documents that need to be included.
