NEW QUESTION: 1

You are working with a customer who is using Chef Configuration management in their data center. Which service is designed to let the customer leverage existing Chef recipes in AWS?

- A. AWSOpsWorks
- B. AWSCloudFormation
- C. AmazonSimple Workflow Service
- D. AWSElastic Beanstalk

Answer: A

Explanation:

Explanation

AWS OpsWorks is a configuration management service that helps you configure and operate applications of all shapes and sizes using Chef. You can define the application's architecture and the specification of each component including package installation, software configuration and resources such as storage. Start from templates for common technologies like application servers and databases or build your own to perform any task that can be scripted. AWS OpsWorks includes automation to scale your application based on time or load and dynamic configuration to orchestrate changes as your environment scales.
