Why not have a try on our E_ACTCLD_21 exam questions, you will be pleasantly surprised our E_ACTCLD_21 exam questions are the best preparation material, Among them, the Software version has the function to stimulate the exam which can help the learners be adjusted to the atmosphere, pace and environment of the real E_ACTCLD_21 exam.

You can learn it with your personal computer and as the shining point is that you [HP2-H60 Reliable Test Cram](#) can easily find the part you wanted with finger flipped gently, Besides, we are pass guarantee, if you indeed fail the exam, we will be money back guarantee.

NEW QUESTION: 1

管理者がデバイスをスイッチに接続しており、セキュリティ上の理由から、実行コンフィギュレーションに追加されたアドレステーブルから動的に学習されたMACアドレスが必要です。

これを達成するには何をしなければなりませんか？

- A. switchport protectedコマンドを使用して、MACアドレスを構成に追加します。
- B. スイッチポートモードをトランクに設定し、実行コンフィギュレーションを保存します。
- C. no switchport
- port-securityコマンドを使用して、MACアドレスを構成に追加できるようにします。
- D. ポートセキュリティを有効にし、キーワードstickyを使用します。

Answer: D

Explanation:

One can configure MAC addresses to be sticky. These can be dynamically learned or manually configured, stored in the address table, and added to the running configuration. If these addresses are saved in the configuration file, the interface does not need to dynamically relearn them when the switch restarts, hence enabling security as desired.

NEW QUESTION: 2

When defining QoS global properties, which option below is not valid?

- A. Weight
- B. Schedule
- C. Authenticated timeout
- D. Rate

Answer: B

Explanation:

Explanation/Reference:

NEW QUESTION: 3

DRAG DROP

You are analyzing the memory usage of a Microsoft SQL Server instance. You need to obtain the information described on the following table.

Which performance counter should you use for each requirement? To answer, drag the appropriate performance counters to the correct requirements. Each performance counter may be used once, more than once or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Requirement1: SQL Server: Memory Manager: Total Server Memory (KB)

This counter specifies the amount of memory the server has committed using the memory manager.

Requirement2: SQL Server: Memory Manager: Granted Workspace Memory (KB) Specifies the total amount of memory currently granted to executing processes, such as hash, sort, bulk copy, and index creation operations.

Requirement3: Process: working Set

Each time a process is created, it reserves the minimum working set size for the process. The virtual memory manager attempts to keep enough memory for the minimum working set resident when the process is active, but keeps no more than the maximum size.
