2021 The Best T2 – 100% Free Study Material | T2 Reliable Braindumps Book

We promise that as long as you use our products of T2 study guide, you will be able to pass the WorldatWork T2 certification exam, And at the same time, the T2 learning guide must stand the test of the market and can make the customers understood by all over the world.

If you join, you will become one of the 99%, Please believe that with T2 real exam, you will fall in love with learning, The system will send our candidates the T2 latest database automatically if there is any update.

Our T2question torrent can simulate the real operation test environment to help you pass this test, So our T2 exam questions are of positive interest to your future.

It's time to establish a necessary goal, the WorldatWork WorldatWork Other Certification certification, for a better you, APP version of our T2 exam questions can work in an offline state.

NEW QUESTION: 1

HOTSPOT

Your network contains an Active Directory domain named contoso.com. The domain contains two servers named Server1 and Server2. Server1 has the Network Policy Server server role installed. Server2 has the DHCP Server server role installed. Both servers run Windows Server 2012 R2.

You are configuring Network Access Protection (NAP) to use DHCP enforcement.

You configure a DHCP scope as shown in the exhibit. (Click the Exhibit button.)

You need to ensure that non-compliant NAP clients receive different DHCP options than compliant NAP clients.

What should you configure on each server? To answer, select the appropriate options for each server in the answer area.

Answer:

Explanation:

Explanation:

Health Policies

Server Options

* Health policy on the NAP server.

* The DHCP server must be NAP enabled.

Note: With DHCP enforcement, a computer must be compliant to obtain an unlimited access IP address configuration from a DHCP server. For noncompliant computers, network access is limited by an IP address configuration that allows access only to the restricted network. DHCP enforcement enforces health policy requirements every time a DHCP client attempts to lease or renew an IP address configuration. DHCP enforcement also actively monitors the health status of the NAP client and renews the IPv4 address configuration for access only to the restricted network if the client becomes noncompliant.

NEW QUESTION: 2

You manage an application running on Azure web apps in a Standard tier. The application uses a substantial amount of large image files from a storage account and is used by people around the world.

Users from Europe report that the load time of the site is slow.

You need to implement a solution by using Azure services.

Which two actions will achieve the goal? Each correct answer presents a complete solution.

- A. Configure Azure CDN to cache all responses from the application web endpoint.
- B. Configure Azure CDN to cache site images and content stored in Azure blob storage.
- C. Configure Azure web app auto-scaling to increase instances at high load.
- D. Configure Azure blob storage with a custom domain.

Answer: A,B

Explanation:

Explanation/Reference:

Explanation:

Blobs that benefit the most from Azure CDN caching are those that are accessed frequently during their time-to-live (TTL) period. A blob stays in the cache for the TTL period and then is refreshed by the blob service after that time is elapsed. Then the process repeats.

NEW QUESTION: 3

You deploy your custom Java application to Google App Engine. It fails to deploy and gives you the following stack trace.

What should you do?

- A. Digitally sign all of your JAR files and redeploy your application
- B. Upload missing JAR files and redeploy your application.
- C. Recompile the CLoakedServlet class using and MD5 hash instead of SHA1

Answer: A
