D. オプションC

Answer: A

NEW QUESTION: 3
A developer is going into production with a consumer web application in IBM Bluemix PaaS.
The developer is keen to understand how the application is performing to maximize customer retention.
Where can the developer look to obtain a current display of CPU, disk and memory usage?
A. Instance Details panel
B. Track and Plan
C. Workload Scheduler
D. AppScan Dynamic Analyzer
Answer: A
Explanation:
The Instance Details panel provides the current view of running instances for an application, and the CPU and memory utilization of each instance. This panel can be accessed from the CloudFoundry dashboard by selecting an application to bring up the overview, and then clicking on the runtime for the application.
